

Accessible documentation for everyone

Revathy Venugopal

Ansys

/ Introduction

Accessible documentation emphasizes inclusive document creation for universal understanding. Uncover practical strategies to foster equitable information access, empowering you to produce improved, accessible documents for all.

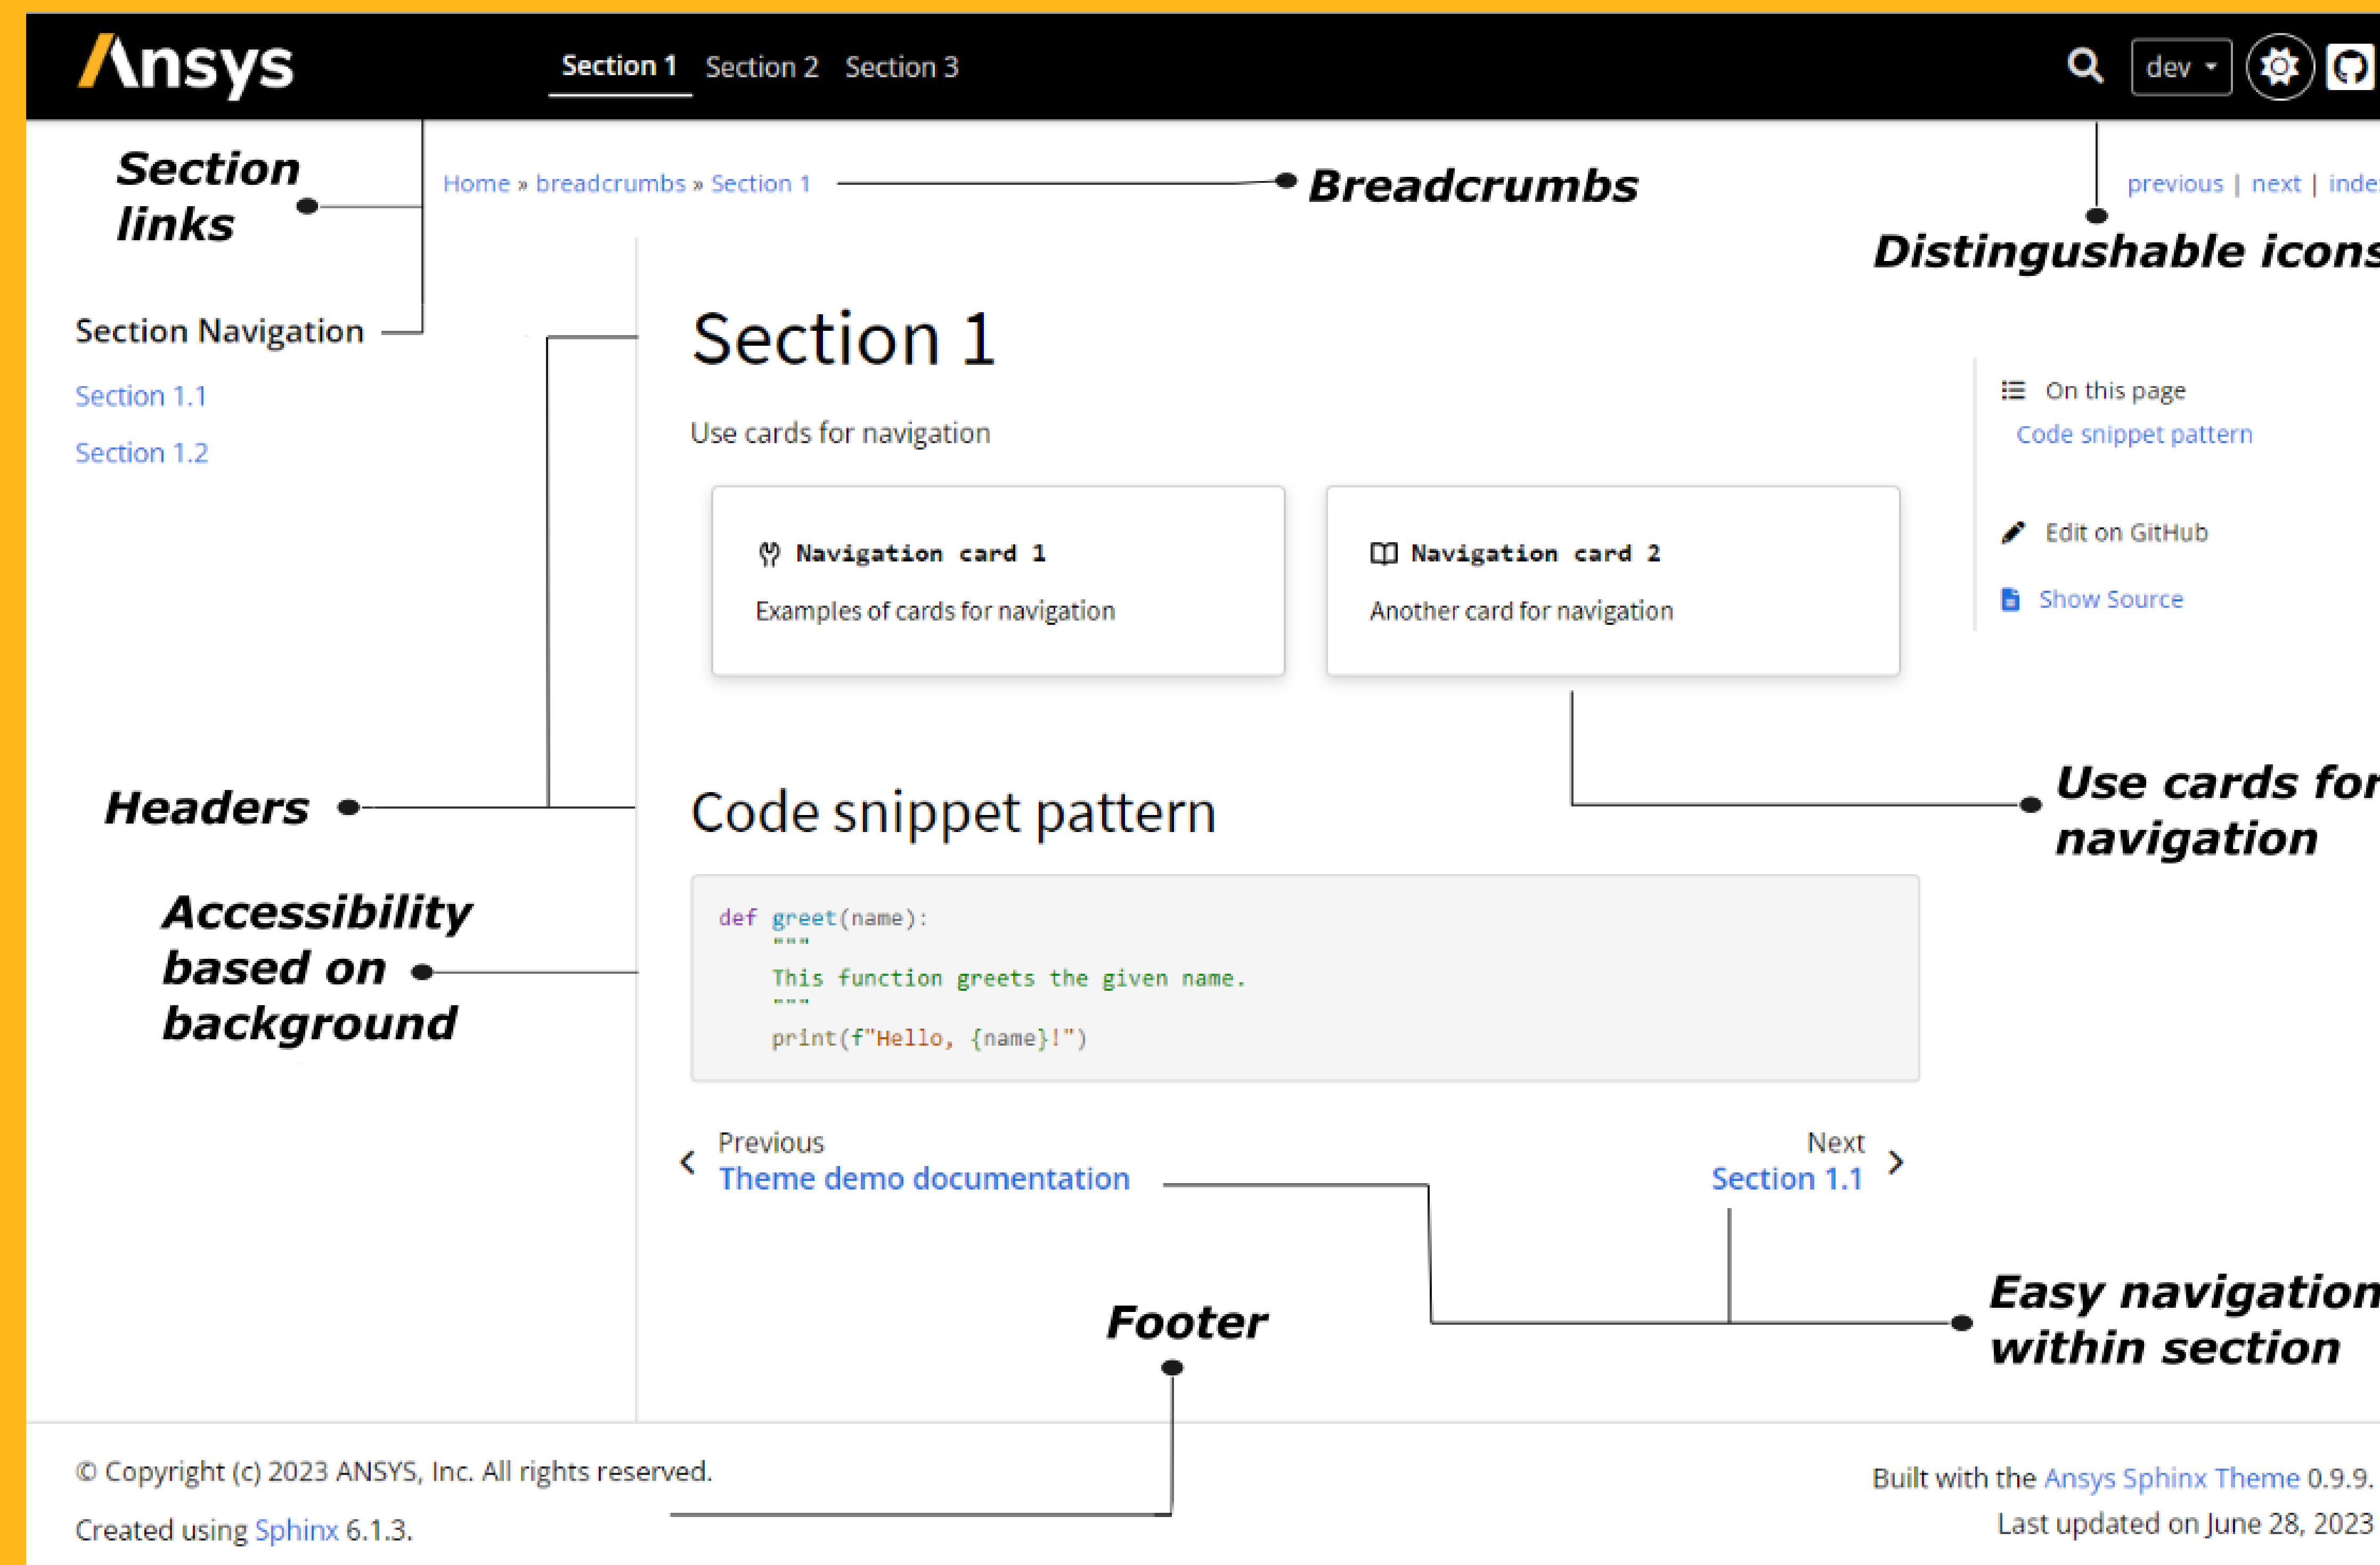

/ Accessibility guidelines

- Readable fonts and contrast
- Structured document with headings
- Alternative text (Alt Text) for images
- Color contrast considerations
- Multimedia accessibility
- Accessible document formats

/ Document navigation

- Use clear and consistent navigation elements
- Provide skip navigation links
- Implement breadcrumb navigation
- Include a search function
- Ensure keyboard accessibility

Accessible document showcase

/ Inclusive visual design

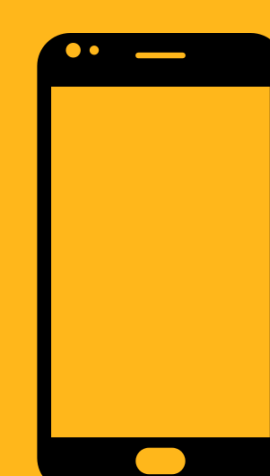

- Clear and distinguishable icons and graphic
- Use accessible color palettes
- Consider font choices
- Accommodate color blindness

/ Document versioning

- Maintain accessibility during updates
- Preserve accessibility features during version transitions
- Ensure backward compatibility

/ Conclusion

By prioritizing accessibility in our documentation, we can empower individuals with diverse abilities, foster inclusivity, and create a more equitable society
